Activity at the Reno Smelter.

Yesterday and Wednesday the workmen at the new smelter were busily engaged getting everything in readiness for the ore run.

During the interim a large quantity of ores and fluxes were received, and this morning the fires will be kindled. If the ore supply holds out the stream of copper will flow without interruption.

The first day's run demonstrated that the smelter is capable of doing the work claimed for it.

Reno Filling Up.

James Sullivan, proprietor of the Russ house, informed a JOURNAL scribe yesterday that to the best of his knowledge every hotel and rooming house in Reno is full already with St. Louis fair guests. Outside rooms are being engaged and big supplies of cots laid in, in order to accommodate next week's crowd.

A LECTURE BY WILSON

Practical Address Delivered Before the California Dairy Convention.

Prof. N. E. Wilson of the University of Nevada delivered an address yesterday before the California Dairy-men's convention at Sacramento, on the subject, "The Alkali Test for Lactic Acid in Cream." He also spoke Wednesday, taking for his subject "Cream Testing." We take the following extracts from the Record-Union:

In his introductory he pointed out that through the advent of the Babcock test the creamery and dairy industries were provided with a quick and accurate method of testing milk and its products.

He pointed out that as cream is more viscous than milk, it would adhere to the glass in greater quantities, so that in order to make an accurate test he advocated weighing the cream to be tested, instead of measuring.

He then treated at length the method of applying acids in the test, and the readings of the glass in determining the amount of the fat column in cream tests. He pointed out the necessity of having correctly graduated glassware.

In the after discussion of his subject with the members he demonstrated that he was thoroughly conversant with all the details of cream testing, and he was listened to with the deepest interest by all present.

He then presented a sample of cheese made in his section from alfalfa feed by R. J. Sanders of Reno, and invited all present to sample the same and give their candid idea of its properties. This was done, and the cheese received favorable commendation.

Prof. Wilson's address was listened to attentively, and at its conclusion he was overwhelmed with queries.

THE LOCAL PROSPECTS

Brief Items Concerning the Mining Prospects Around This City.

The Reno reduction works will start up early in October.

There will be quite a display of Washoe county ore at the pavilion next week.

Thirty-five tons of Reno Star ore is sacked for shipment to the Reno smelting works.

Rafferty & Co. are developing a claim at Steamboat that carries eleven per cent copper.

It is rumored that the N. E. and D. Co. are figuring on a smelter to work their Peavine ore.

The tunnel on the Peavine Jumper is in forty-eight feet, and the owners expect to strike ore within ten feet.

Ore is being piled up at the Nash and White mines on Dogskin. Shipments will probably begin by the end of the month.

PERSONAL MENTION.

Gossip About the Migrating Public as They Come and Go.

Growing Bigger and Richer.

Nothing has been heard about the Wedekind mine for several weeks. This causes the "I-told-you-so" lobbyists to wag their addled pates.

The scribe was questioning Mr. Wedekind yesterday and the old man said: "If the mine holds out only twenty feet further likeli'ts doing now I'll be glad I didn't sell for a hundred thousand dollars."

His ore house is full of rich rock, sacked for the smelter. In the bottom of the workings the ore body is five feet wide and assays from \$30 to \$1,700. The latter values occur in bunches. The formation is becoming well defined and the gold and silver are both visible in the native form although the values are mostly in the chlorides. Sheets of horn silver an inch square are of frequent occurrence.

Laid to Rest.

The funeral of Mrs. W. S. Cohn took place yesterday from the Riverside undertaking parlors. A large gathering of friends and acquaintances of the deceased were present, and the floral offering were numerous.

Rev. F. Vernon Jones conducted the services. R. Geles, Ed. Ryan, J. L. Conroy and John Daniels officiated as pall-bearers.

DELEGATES APPOINTED

Democratic, Silver and Republican Parties Choose Representatives.

Bryan club hall was the scene of a double primary convention last night. Geo. Holesworth officiated as chairman and Captain Cox as secretary of the Silver party contingency and Dr. Gibson and Barney Campbell were respectively chairman and secretary of the Democratic side of the house.

The latter chose 49 delegates to the county convention. The nominations will be passed upon by the county central committee. The Silver party put up an equal number of delegates who will be voted for in primary election.

The G. O. P's met last night in the office of Col. H. B. Maxson, who presided. W. E. Fogg and A. D. Ayres were secretaries. An attempt was made to nominate 63 Republicans, but an even five dozen were all the acceptable men that took the honor upon them.

About Granite Hill.

Granite Hill is coming to the front as a producer of copper, gold and silver. Recently there have been several good shipments from this district. In the olden times these mines were worked extensively for bluestone. Mr. Dickey, an old timer of Granite Hill, gives the following as the production of some of these mines in the early eighties:

Harry R, 100 tons; Copper Mountain now known as Walker, 40 tons; Sierra Rose, now known as Great Western, 50; Gray Eagle, now known as Bald Eagle, 50 tons.

The average value of this ore was \$100 per ton.

Stock Movements.

Twenty carloads of cattle were shipped west from R. W. Parry's corral yesterday.

A trainload of sheep arrived from the east last evening.
